INTRODUCTION

Guardian is an anti-theft software for mobile phone: easy, efficient and very effective.

Every time the phone is powered up, Guardian check if the SIM card is authorized, if not Guardian will send a notification sms (invisible) to the previously selected number, containing the number of the new inserted sim card.

COMPATIBILITY LIST

- **Nokia:** 3250, 5320 XpressMusic, 5500 Sport, 5700 XpressMusic, 5800 XpressMusic, 6110 Navigator, 6120 Classic, 6121 Classic, 6124 Classic, 6210 Navigator, 6220 Classic, 6290, 6650, E50, E51, E60, E61, E61i, E62, E63, E65, E66, E70, E71, E72, E75, E90 Communicator, N71, N73, N75, N76, N77, N78, N79, N80, N81, N81 8Gb, N82, N85, N91, N91 8Gb, N92, N93, N93i, N95, N95 8Gb, N96
- **LG:** KS10 Joy, KT610
- **Samsung:**SGH-i400, SGH-i450, SGH-i520, SGH-i550, SGH-i560, SGH-G810, SGH-L870, i7110, i8510 INNOV8

FEATURES

Guardian is available in 3 different Editions: **Free**, **Gold** and **Platinum**.

The **Free** Edition provides basic antitheft features.

The **Gold** Edition can communicate the cell of identification where the phone is connected, to permit a rough localization, moreover, it allows to protect, with a secret code, the access to sms, phonebook, calendar and other applications, in order to guarantee a good protection of the user privacy.

The **Platinum** Edition provides many functionalities of remote control, including the ability of getting back the sms / phonebook entries of the lost phone, knowing the exact position of the phone thorough the GPS system , deleting sms /phonebook /photos / videos from the lost/stolen phone.

All the editions have been translated in English, French, German, Spanish, Italian and Serbian: the language in use will be the same as your current phone language.

Note: All the SMS sent/received by Guardian are invisible, there is no notification to the user, no icon, no light, no alert, no vibration, nor trace of messaging in outbox/sent folder neither trace in the activity log.

INSTALLATION

If you haven't installed NOKIA PC Suite in your pc, you can download this software from: <http://europe.nokia.com/pcsuite/> install and follow the instructions.

Using Nokia PC Suite the installation of new applications on your phone will be more simple and easier.

Connect to the official site <http://www.Guardian-Mobile.com/> and download the Guardian installation package.

Connect the phone to the PC, double click on the package to start the installation of Guardian, after that follow the instructions on the phone.

Alternatively, after the download of the Guardian installation package in the PC, you can send it to the phone using infrared or Bluetooth, in this case a new message will appear in the message inbox, you have to open it to start the installation of Guardian.

CONFIGURATION

The configuration of Guardian is easy and immediate, it is enough a short time to configure all the parameters needed by the software.

- “Status”, shows if the software is enabled or disabled.
- “Recipient”, is the recipient number of the sms sent when a unauthorized SIM is inserted
- “SMS Text”, is the text sent when a non-authorized SIM is inserted
- “Secret Code”, this secret code is really IMPORTANT. It used to enter in Guardian or into a **protected application** and to use **remote commands**,
- “Protect Applic. Period”, shows after how much time of phone inactivity the applications inserted in the protected application list will be blocked. It is mandatory to insert the secret code to enter in a protected application and inserting the correct secret code you will have free access to ALL the applications. If the phone remains inactive for more time than the value of this parameter, the applications will be protected again and you will have to insert the secret code another time.

Besides the various time values there are also two particular ones:

- “Immediately”, the secret code is required every time you start a protected application,
- “Never”, the secret code is required only the first time, after that it won't be required any more till the next power down of the phone.

QUICK CONFIGURATION

To quickly configure your anti-theft follow below steps:

1) Go to parameter "*Recipient*", select "*Options > Change*" and choose from the phonebook the recipient number of the notification sms "*SIM Changed*".

2) Insert your "*Secret Code*".

Note: the secret code must contain at least 5 digits. It will be required when you enter in Guardian, in any "**protected application**" and to use "**remote control commands**".

3) Finally change the "*Status*" of Guardian in "*Enabled*".

AUTHORIZED SIM LIST

All the sim present in this list are classified by Guardian as sim authorized to use the phone. The list is useful if you want to use your phone with different sim cards, in fact Gardiant won't send any sms of notification "Sim Changed" if you insert an authorized sim.

Note: the **Free** edition allow to have only the sim used to install the program in the authorized sim list.

Instead both **Gold** and **Platinum** edition permit to have an endless number of Authorized sim.

In this menu are present the following commands:

- "Rename", allows to modify the name of the selected sim
- "Remove", removes the selected sim from the list
- "Add", shows the instructions to add a new sim in the list

To add a new sim to the list:

- 1) Disable Guardian temporarily
- 2) Insert the new sim in the phone and power it up
- 3) Start Guardian and the new sim will be added to the list.

Note: You can add also a new sim without disabling the anti-theft, but Guardian will send a notification sms after the power up of the phone, because it will detect a unauthorized sim.

Suggestion: Use the option "Rename" to assign meaningful name to the various SIMs, so you can easier distinguish them.

PROTECTED APPLICATIONS

This view shows the list of all the application installed on the phone and you can select those ones that you want to protect. The protected applications are identified by a tick on the right of their name.

Note: It may seem that some applications are present more times in the list, but although the name is the same these applications are different and perform different functionalities, so if you don't know which is the difference between them just protect both ones.

Suggestion: To speed up the search of a particular application, you can digit its name, the software will show the application having the name that starts with the characters inserted.

In the menu you can find the following commands:

- **"Add / Remove":** inserts or removes the selected application from the protected application list
- **"Large / Small icons":** modify the icons size in the list

Suggestion: To prevent an unauthorized uninstall process, just protect the application: **"Installer"**. If someone tries to uninstall Guardian, the phone will require the *"secret code"*.

Suggestion: To defend your personal data you can protect the following applications

"Text Message"
"Messaging"
"Contacts"
"Calendar"
"Gallery"
"Log"

PURCHASE AND REGISTRATION

Whenever you can convert your **Free** edition to the **Gold** or **Platinum** edition.

In this command menu the following options are present:

- “*Register*”, this menu allows to convert the **Free** edition to **Gold** or **Platinum** after buying the product
- “*Buy*”, open the URL where you can buy the **Gold** or **Platinum** edition
- “*Send Guardian*”, allows to send the program to your friends via Bluetooth or Infrared (This option is not always available)
- “*Check updates*”, check if new program updates are available. If updates are available you will be able to download and install it on the phone immediately. We suggest checking periodically if new updates are available.

Nota: Using the **Free** edition is mandatory to check the availability of new updates every 15 days, otherwise you won't be able to use the software anymore.

PURCHASE

Once you complete the purchase procedure, you will receive immediately a personal Registration Code (on display phone and by email). You will have only to insert the Registration Code in the program to convert immediately the **Free** Edition to the **Gold** or **Platinum**.

To purchase the **Gold** or the **Platinum** Edition, visit the official website

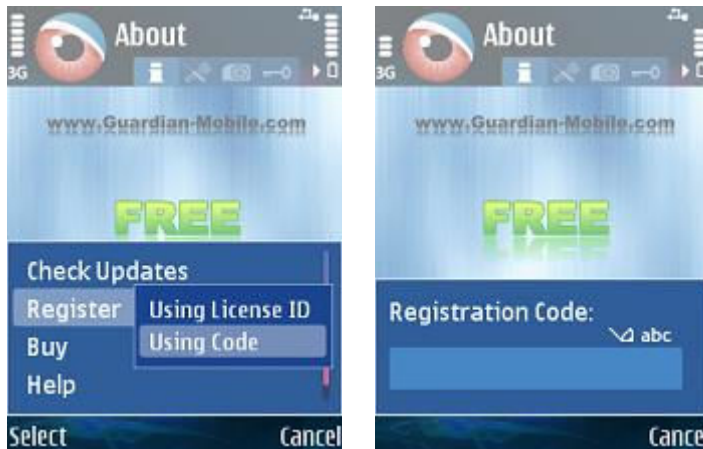

<http://www.Guardian-Mobile.com/>

or select “*Options > Buy*” in the program menu to do it from your phone itself.

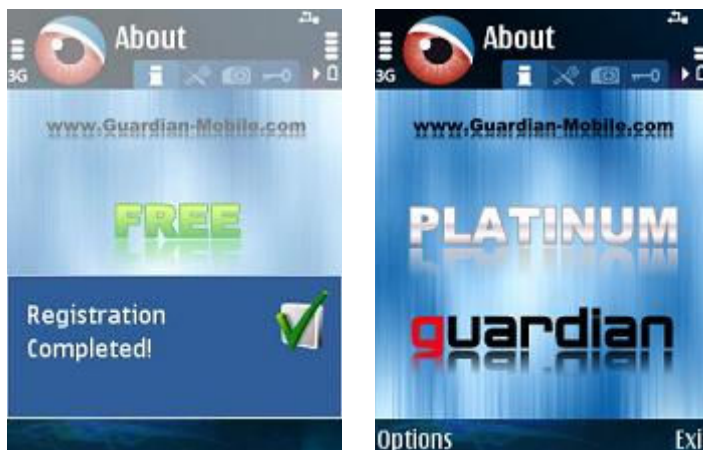

If you don't have a PayPal account, you can pay using your credit card (Visa, Mastercard, American Express, etc...)

REGISTRATION

After receiving the Registration Code, enter in Guardian, select the command menu “*Options > Register > Using Code*” insert the 8 characters code, which is case sensitive.

If you insert the correct Registration Code the software will be automatically converted to the purchased edition.
